

## PANDUAN PEMASANGAN PERISIAN ANTIVIRUS ESET ENDPOINT SECURITY 6

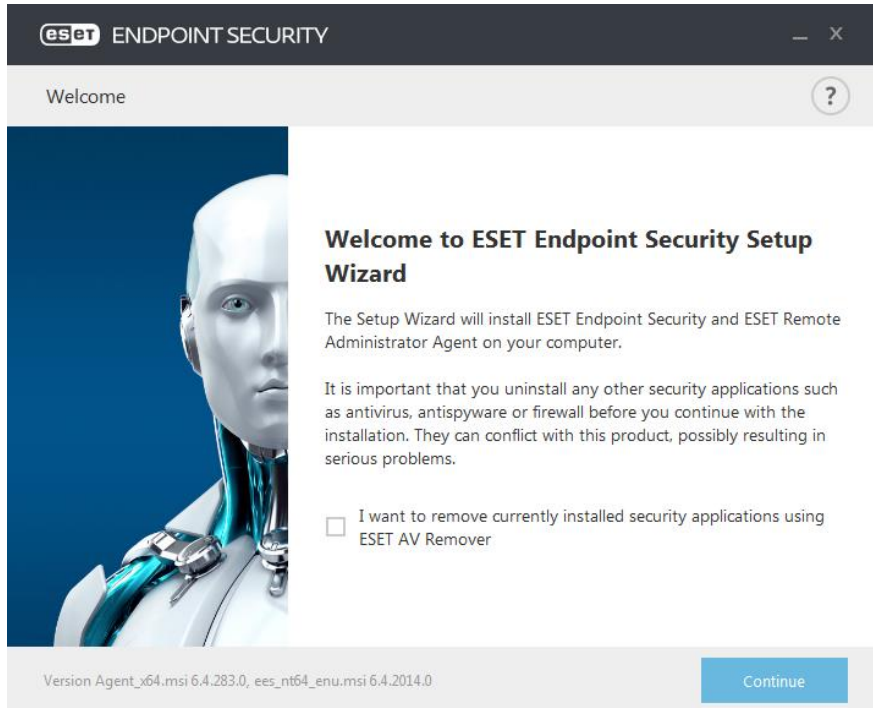

Sebelum memulakan pemasangan pastikan anda remove perisian antivirus sedia ada terlebih dahulu. Jika terdapat 2 atau lebih perisian di dalam komputer akan menyebabkan berlaku konflik dan tidak dapat berfungsi dengan baik.

1. Kenalpasti jenis sistem pengoperasian windows yang digunakan samada 32 bit atau 64 bit
  - a. Klik start – Control Panel – System and Security – System

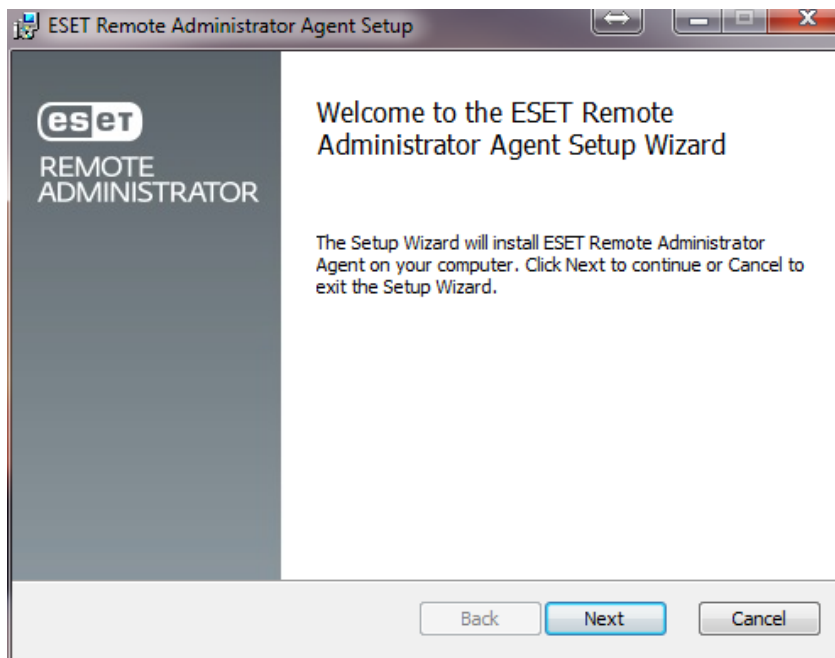

2. Muat turun perisian antivirus dari laman web [software.kk.usm.my](http://software.kk.usm.my)
  - a. [Eset 6 \(64bit\)](#)
  - b. [Eset 6 \(32bit\)](#)
3. Remove perisian antivirus sedia ada
  - a. Klik Start – Control Panel – Programs and Feature – Uninstall a program
  - b. Selesai proses uninstall, restart PC
4. Install ESET Installer (ERA\_Installer\_x64\_en\_us / ERA\_Installer\_x86\_en\_us).

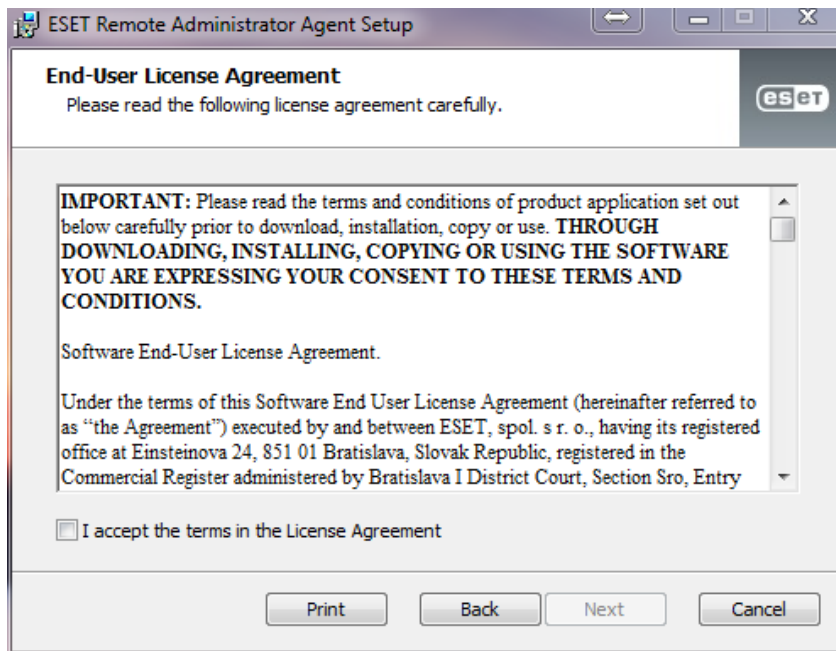

5. Untick "I want to remove currently installed security applications using ESET AV Remover". Klik 'Continue'

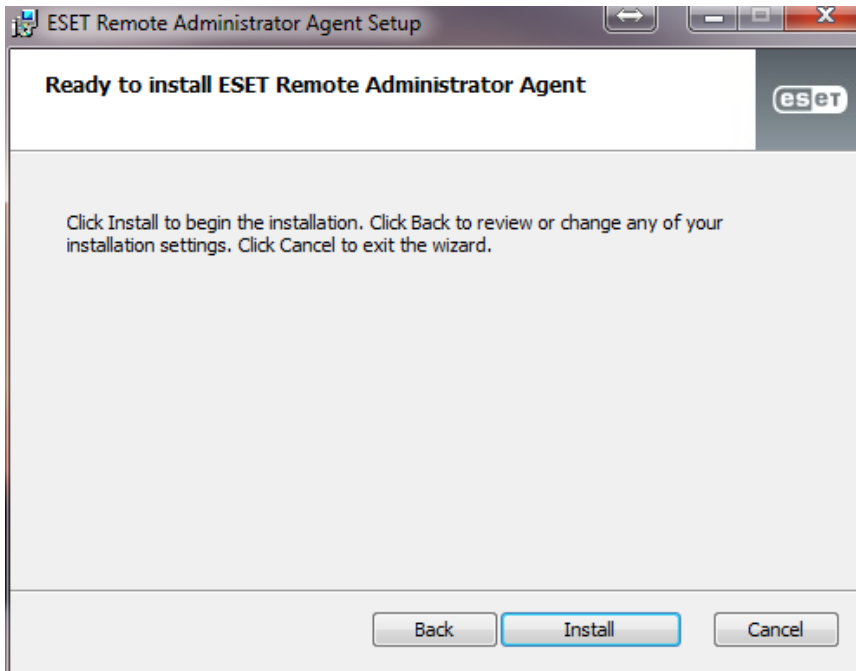

6. Klik 'Next' ESET Remote Administrator Agent Setup

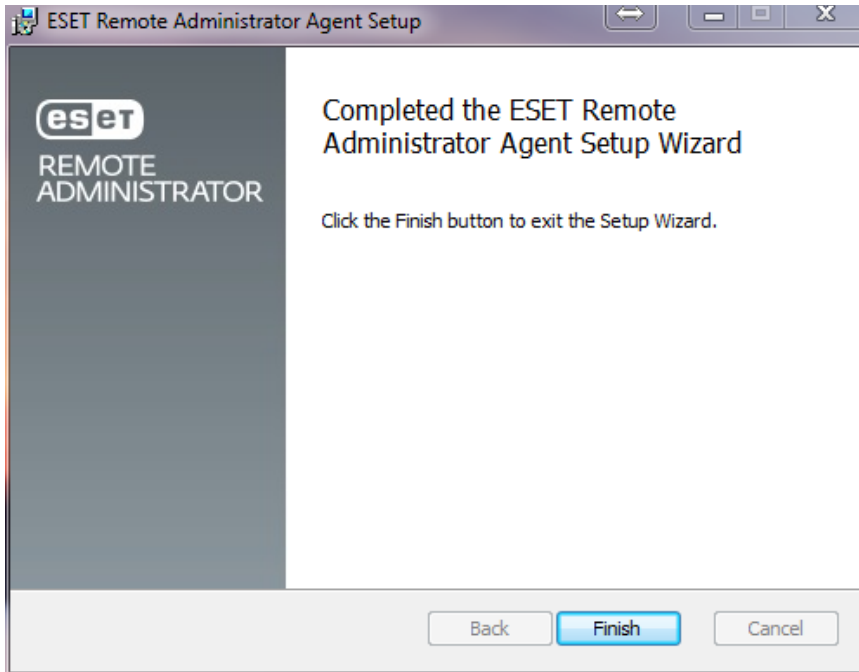

7. Tick "I Accept the terms in the License Agreement". Klik 'Next'

8. Klik 'Install'.

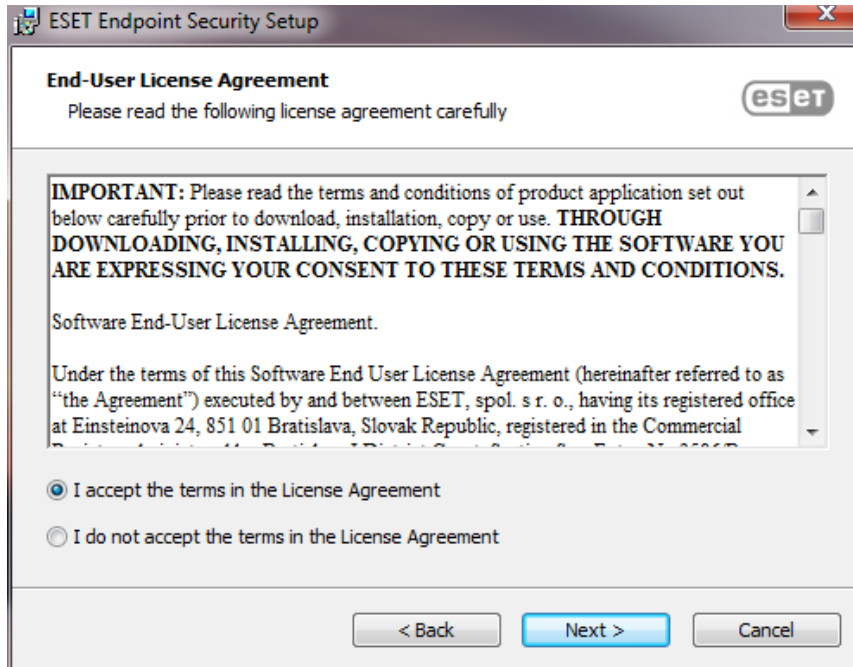

9. Setelah selesai instalasi. Klik 'Finish' .

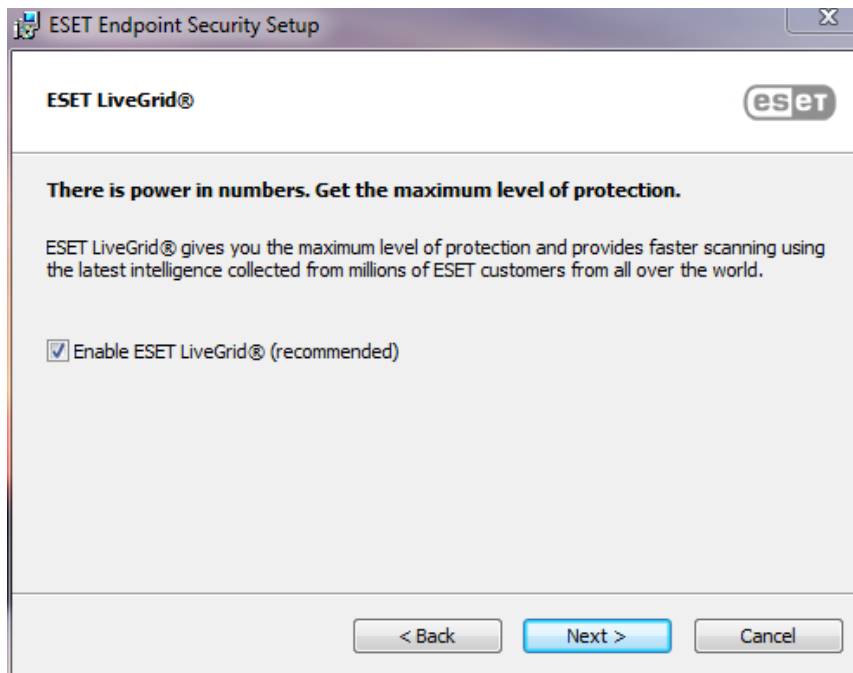

10. Seterusnya, instalasi Eset Endpoint Security. Klik 'Next'

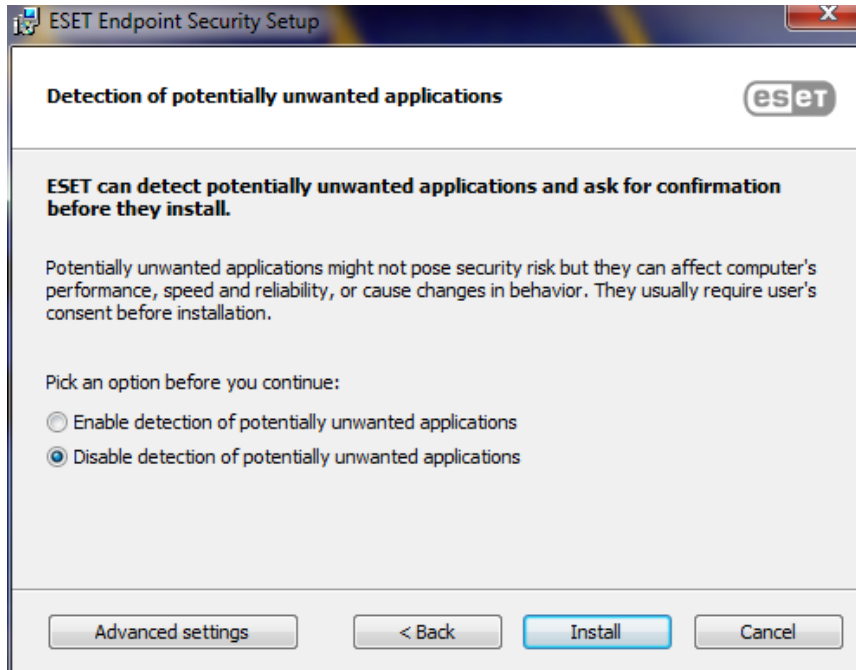

11. Tick "I Accept the terms in the License Agreement". Klik 'Next'

12. Tick "Enable ESET LiveGrid". Klik 'Next'

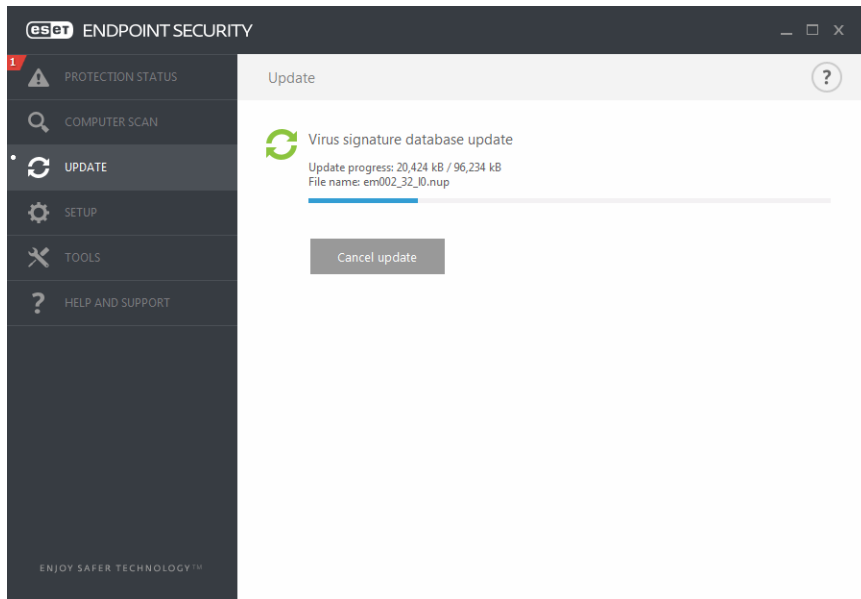

13. Tick "Disable detection of potentially unwanted applications". Klik 'Install'

14. Selesai instalasi ESET Endpoint Security, Klik 'Finish'

15. Buka 'ESET Endpoint Security', Klik 'UPDATE' dan kemaskini virus signature terkini.
